

Thank you for your interest in this study of kidney cancer treatment side effects! To participate in this study you must be at least 18 years old and have been diagnosed with kidney cancer.

You do not need to be receiving treatment to participate.

Participants in this study will be asked to complete online surveys about their cancer and their quality of life. Three sets of surveys will be completed over a 3-4 month period. Participants will receive a \$50.00 gift card for participating in the study.

If you are eligible and interested in this study, please select the group below that best describes you. Once you make your selection you will be taken to a webpage to obtain additional information and consent to participate in the study.

a) If you are currently receiving at least one of the following drugs: pazopanib (Votrient), sorafenib (Nexavar), sunitinib (Sutent), bevacizumab (Avastin), everolimus (Afinitor), temsirolimus (Torisel), tivozanib, or axitinib, **please copy and paste this URL into your browser:**
